MAKE HISTORY™

NEW HEADS NEW CABINETS

**TOUGHER, LOUDER,
BETTER-SOUNDING BASS
NOW IN HEADS AND CABS**

Fender® Bass Amplification now complements its popular Rumble™ combo amps with two new heads and three new cabinets that deliver colossal sound considering their relatively diminutive size. These newest members of the Rumble family are small and powerful, with a special magnetic mounting system that keeps the heads firmly fixed to any of the powerful and rugged new cabinets without interference from vibration, even at extreme volumes. The cabinets are tuned for enhanced frequency response that produces the kind of powerful low end you'd expect from a much larger Fender PRO series rig.

The Rumble 350 Head and Rumble 150 head deliver powerful tone, professional features and easy operation in compact and lightweight packages. Each boasts a very conservative power rating (350 watts and 150 watts, respectively) with an XLR output (with ground lift) and two preset EQ shapes (punch and scoop), and bassists can blend clean and overdriven tones using the footswitchable overdrive (footswitch optional).

The Rumble 350 Head, which weighs in at a remarkably light 5.6 pounds, has a three-band active EQ with semi-parametric midrange control. The Rumble 150 head is just a shade lighter at 5.5 pounds, with a four-band active EQ. Each amp also features a balanced effects loop, Delta Comp™ adaptive compression circuitry, -6dB pad switch, headphone jack and variable speed fan cooling.

Both heads mount firmly to the new Rumble cabinets using the new Rumble magnetic mounting system, and the Rumble 350 Head comes with a carrying bag.

RUMBLE™ 410 CAB

1000W POWER HANDLING @ 4Ω | (4) 10" SPEAKERS

The Rumble 410 Cabinet boasts huge Fender bass tone from a great-sounding modern cabinet design. Four 10" Fender Special Design speakers pump a lot of air and fill a lot of room, with a switchable tweeter (full/off/-6dB) for adjustable high-end response. Rated at a volcanic 1,000 watts (at 4 ohms), it also features removable casters and the new Rumble magnetic mounting system.

WWW.FENDER.COM/RUMBLE

RUMBLE™ 2X8 CAB

500W POWER HANDLING @ 8Ω | (2) 8" SPEAKERS

The Rumble 2x8 Cabinet handles 500 watts and weighs in at a mere 28 pound, with dual 8" Eminence® neodymium speakers that deliver even more punch than 10" speakers. It too delivers more pronounced low-end frequency response than most small cabs, and it too features a switchable tweeter (full/off/-6db), side handle for easy portability, and the new Rumble magnetic mounting system.

RUMBLE™ 112 CAB

500W POWER HANDLING @ 8Ω | 12" SPEAKER

The Rumble 112 Cabinet handles 500 watts but weighs a mere 24 pounds. Its special lightweight design delivers more pronounced low-end frequency response than most small cabs, and its 12" Eminence® neodymium speaker delivers the knockout punch of a 10" speaker and the seismic boom of a 15" speaker. Other features include a switchable tweeter (full/off/-6dB), side handle for easy portability, and the new Rumble magnetic mounting system.

LIFIERS

RUMBLE™ 350 COMBO

350W | (2) 10" SPEAKERS

Bassists prize high-powered 2x10" combos for their headroom and definition. Brace yourself for the Rumble 350 — the flagship of the Rumble family and the amp that gets it done in any musical situation. Powerful Fender® bass sound and a wealth of features that give working bassists the punch and overdriven grind they need to nail the gig.

Blend the 350's musical overdrive with its pure, clean bass tone to get everything from mild overdrive to full-on fuzz without losing the low end. The high-frequency horn features a convenient front panel on/off switch. Dial in specific frequencies with the semi-parametric midrange control, and shape your sound even further using the punch and scoop EQ presets. The XLR output sends it all to the stage or to the recording console to help deliver your music to the masses.

RUMBLE™ 150 COMBO

150W | 15" SPEAKER

There's nothing quite like the boom and depth of a 15" speaker. When you join the band, the Rumble 150 has all that and more. You get big Fender tone and power in a rugged, cool-looking amp with a ton of great features, and it's easily transported on removable wheels.

Like its big brother, the Rumble 350, the Rumble 150 has a musical overdrive, high-frequency horn with front panel on/off switch, punch and scoop EQ presets and an XLR output.

OVERDRIVE

MIDRANGE CONTROL

PUNCH & SCOOP

RUMBLE 75 COMBO

75W | 12" SPEAKER

Big bass, tilted back. If you need quality tone in a smaller amp that can be angled for better close-range monitoring, brace yourself for the Rumble 75. It will fill a coffeehouse, breathing full low end into an acoustic set, and it works great with electric, acoustic and upright basses.

Perfect for traditional or tilt-back placement. The Rumble series musical overdrive (controlled with optional footswitch) is here, as are the punch and scoop EQ presets. The 75 also has dual instrument inputs, a four-band fixed EQ, ¼" line out, auxiliary input and headphone jack.

RUMBLE 30 COMBO

30W | 10" SPEAKER

The sweet spot of the Rumble series hits it just right — powerful enough to sound big, and small enough to grab and go. With pure, clean bass or gritty overdrive, and traditional or tilt-back placement, the Rumble 30 has it covered. Perfect for rehearsing with friends and for on-the-spot inspiration.

Features include the Rumble series musical overdrive, tilt-back design, dual instrument inputs, a three-band fixed EQ, auxiliary input and headphone jack.

OVERDRIVE

PUNCH & SCOOP

AUX & HEADPHONE

RUMBLE™ 15 COMBO

15W | 8" SPEAKER

Small black box. Big bass sound. That's what you get from the baby of the Rumble family, but it's also tough — with rugged black vinyl covering, nickel corners, metal grille and a heavy-duty handle.

The Rumble 15 is the perfect practice station. Plug in your portable audio device and play along, and don't be surprised when the hours turn into days (after dark, plug in your headphones and by all means continue).

Features include a three-band fixed EQ, auxiliary input and headphone jack.
